## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 327-513, 516-522 and 524-526, drawn to a multipurpose tool, classified in class 7, subclass 160.
  - II. Claims 514, 515, 523 and 527-529, drawn to a hole puncher, classified in class 83, subclass 167.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the support stage, stop and window of the puncher are not recited in the combination. The subcombination has separate utility such as a hole puncher alone.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3723

5. Claims 327, 504-513, 516-522 and 524-526 are generic to a plurality of disclosed patentably distinct species comprising Figs. 1-10, Fig. 11, Figs. 12-15, Figs. 16-24, Fig. 25, Figs. 26-30, Figs. 31-33, Figs. 34-39, Fig. 40, Figs. 41-45, Figs. 46-48, Figs. 49-53, Figs. 54-57, Figs. 58-61, Fig. 62, Figs. 63-65, Figs. 66-69 and Fig. 70. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joni B. Danganan whose telephone number is 703-305-5930.

The fax phone numbers for the organization where this application or proceeding is assigned are 703-746-3270 for regular communications and 703-305-3579 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1148.
